

PORT BYRON MAN FORESEES RELIEF

S. C. Braganza de la Coralia Predicts Storm Period from August 11 to 16.

DISTURBANCES SEVERE

Again Challenges Weather Bureau for Comparison of Systems of Forecasting.

Five days of heavy rain and resultant disasters, beginning Monday, are predicted by S. C. Braganza de la Coralia, the Port Byron meteorological expert. In a letter to the Chicago Record-Herald the expert, widely known because of his controversy with the United States weather bureau, makes some interesting predictions.

The most important of these, in view of the condition of the crops throughout the country, is the one of five days of rain from Aug. 11 to 16, inclusive. Explosions in coal mines and powder magazines as the result of meteorological conditions and an intense heat wave are also forecast.

FROM TWO WAYS.

In his letter the says: "Relief from on high with speeding wing and centrifugal force is at the present hour hastening from the vicinity of the north magnetic pole in the region of Bothnia island to open the floodgates of heaven and drench the thirsty desiccated earth and suffering humanity with copious showers of rain on Aug. 11 to 16 inclusive, 1913.

"A meteorological 'low' is an atmosphere center of a storm in progress. No meteorologist living or dead knows the origin or cause or direction of 'lows'; if they did, they could predict the weather many years in advance.

"The chief of this weather bureau in Washington will be compelled to register on his weather bureau map, without knowing its cause, an intense 'low' of 29.4, which will emerge from Canada and the Pacific northwestern coast states on Aug. 9-10, 1913. This important storm will cross the Rockies on Aug. 11-12, with heavy thunderbolts in its bosom and a dense mantle of gloom and precipitation in its front; its approach will be heralded with a sudden wave of heat on Tuesday and Wednesday next and the storm will be followed on the last days of the coming week by a sharp, rapid fall of the thermometer which will get close to the freezing point in the extreme northern states.

"A dumb-bell companion 'low' will come up from the Caribbean Sea and enter the Gulf of Mexico, producing abundant precipitation along the southern Mississippi states and the southeast states, also Aug. 11-14.

"These two 'lows' will be apt to join forces in the dry suffering central states about Aug. 13 and produce copious showers, breaking the back bone of the dry spell and producing results which all that implies.

CHALLENGES WEATHER CHIEF.

"The invitation extended to the late chief of the weather bureau to meet me in Washington, London or Paris before a discriminating, scientific audience, to discuss with proofs the comparative merits of our respective meteorological systems is most cordially extended to his illustrious successor, Professor Marvin.

"If the results foreshadowed in this meteorological calculation shall prove materially correct, the writer will give a full explanation of his philosophy of the weather to the Nobel Institute and the British Association for the Advancement of Science, so that it will become the common property of the world and every schoolmarm in every little red schoolhouse will hang out her shingle—Predictions of the weather made one month in advance while you wait," inscribed thereon."

UNCLE SAM WANTS TO DONATE FISH

Government Willing to Stock Your Pond or Lake—Write Congressman Tavenner.

Have you a pond or lake? Then write to Congressman Clyde H. Tavenner at Washington, D. C., and have him send you a blank application for the purpose of applying to the United States bureau of fisheries for a consignment of fish. It will interest you to know that annually thousands and thousands of fish are distributed throughout the country by this bureau.

The varieties are most excellent and their propagation and distribution has done much to increase the supply of commercial fish. More than 95 percent of the fish sent out by the United States fish cultural stations consist of salmon, shad, whitefish, pike, perch, kelleys perch, white perch, lake trout, cod, pollock, flatfish and lobsters. The species most commonly supplied by the government to this congressional district are croppie and strawberry bass, large mouth black bass, sunfish and yellow perch.

Stage Driving in Early Fifties.

"The days of old, the days of gold—the days of '49'—are graphically recalled as we read of the many famous drivers, 'gun' messengers, highway-men and Pony Express riders, described and illustrated in Stage Driving in the Early Fifties, in the August Sports Afield, which tells of the blazing of the trail across the plains and mountains for the first Southern Overland mail route from Fort Smith, Ark., to Fort Yuma and the California coast towns.

As we read, we see the great Concord coach, with its six mettlesome horses champing at their bits, as old Billy Hodges mounts his seat and deftly sorts out his reins. Truly, an era of real men and heroes, as compared to our present cut and dried civilization. The Fiddler—an Arkansas story in S. D. Barnes's best style—is of almost classic excellence, and equally good, though different, is in the Sheep Country, a story of Colorado life. The fisherman will find enjoyment in reading Where the Muskies Strike, Two Suckers, Drumfishing on the New Jersey coast, the Blue Hole, and Afield with Moody; while every one will enjoy listening to the ideas and ruminations of The Man with the Typewriter.

The Churches

SCRIPTURE

1st Corinthians 13th Chapter—1st to 7th verses.

Though I speak with the tongues of men and of angels, and have not charity, I am become as sounding brass, and a tinkling cymbal.

And though I have the gift of prophecy, and understand all mysteries, and all knowledge; and though I have all faith, so that I can remove mountains, and have not charity, I am nothing.

And though I bestow all my goods to feed the poor, and though I give my body to be burned, and have not charity, it profiteth me nothing.

Charity suffereth long, and is kind; charity envieth not; charity vaunteth not itself, is not puffed up.

Doth not behave itself unseemly, seeketh not her own, is not easily provoked, thinketh not evil;

Rejoiceth not in iniquity, but rejoiceth in the truth; beareth all things, believeth all things, endureth all things.

The Woman's Home Mission society of Spencer Memorial Methodist church will be in charge of the services at the church tomorrow evening. They have arranged as a special feature a good musical program with papers and a short talk by Rev. C. E. Hawkins.

CRAZED MEXICAN CAPTURES SALOON

Drives Patrons from Place With Club and Demolishes Fixtures.

Insane with drink, a Mexican armed himself with a club yesterday afternoon and entering a saloon located at Twenty-first street and Third avenue, drove everyone out of the place and took complete possession. A panic was narrowly averted, and when the dark skinned man began to smash furniture and tear down pictures from the walls the police were called. Officer Kell succeeded in arresting the man after a tussle, and this morning a 20-day sentence was imposed. The name given was Nic-Beres.

The trouble started shortly before 4 o'clock. At that hour the barroom was crowded. The Mexican rushed into the place and brandishing his club, threatened to kill everyone who remained in the room. There was a wild rush for the exits, and in less than a minute, Beres had complete possession of the place. He then went behind the bar and began to demolish glassware, next turning his attention to several pictures on the walls. The art views were ruthlessly thrown to the floor and demolished. In the meantime, the police had received a hurry up call, and the arrival of Kell put a stop to the devastation.

EXPERIMENT FARM WHEAT MADE 42 BUSHELS AN ACRE

Aledo, Ill., Aug. 9.—The wheat crop at the state experiment farm adjoining Aledo made 42 bushels per acre, according to Assistant State Superintendent of Fields C. A. Campbell, who was in the city the first of the week. This is considered a heavy yield and is probably the heaviest yield in the country.

Another interesting item at the state field is that the clover which was threshed last week produced 2½ bushels of seed to the acre. Not all of the clover was threshed, a part of it having been cut for hay, according to the state plan followed on all fields.

Mr. Campbell reports the corn on the claims that a fair crop will be assured, claims that a fair crop will be assured with a good rain this week.

CHICK ON GROUNDHOG DAY MOTHER OF BROOD AUG. 2

The Aledo Times-Record prints the following with an apology:

"On the nice bright sunny morning of Feb. 2 last, while the ground hog was taking a good long look at his shadow before he retired for his final six-weeks' snooze, a hen, the property of H. H. Sidwell of Viola, hatched eight chicks. Note the date. Of these eight, she raised seven, six cockerels and one pullet. In June that pullet began to lay. She laid 13 eggs, remained on her nest on and after July 10th and last Saturday, Aug. 2, the day she was six months old, she came forth with a nice brood of chicks. Thus, a January egg became an August flock. Here is reproduction in its highest state."

Police News.

Andrew Larson was fined \$3 and costs this morning on a charge of disorderly conduct. The arrest was made by Officer Berry.

Be sure and take a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy when you start on your trip this summer. It cannot be obtained on board the trains or steamers. TWENTY-FIVE YEARS AGO

—From The Argus Files of 1888—

Aug. 1.—A new aspect has come over the baseball prospects in Davenport, and this morning a contract was consummated by which the franchise of the Minneapolis team in the Western association becomes the property of the Davenport club. The Davenport association met last night for the purpose of disbanding, and had even provided for paying off the men when the dispatch was received. The two clubs will be consolidated and take the place of the Minneapolis club, the players of the Davenport team to be retained.

According to Marshal Brennan's report the Rock Island police made 54 arrests during the month which ceased yesterday. Of this number, 29 were city cases and 25 state. The cost of meals furnished prisoners was \$5.60.

Marshal Brennan has decided not to do things by halves, but to order new regulation clubs and cords for his force at once. Having good men at his disposal at last he proposes to take sufficient pride in them, to have the force one of the best equipped as well as most efficient the city has ever known.

Bridge Tender Sweeney took in \$373.45 at the Rock river toll gate in July.

The new eight-hour postal law, as it pertains to carriers, went into effect at Davenport today. Postmaster Hawes says it will not be introduced here for some days yet.

The Moline Dispatch entered upon the 11th year of its history yesterday, and it has become under the proprietorship of Messrs. McGlynn and Groom, a journal to which the republicans of Rock Island county may point with pride—indeed it is the best republican paper in the county. Many times 10 years of success and usefulness to Messrs. McGlynn and Groom.

Aug. 2.—The Moline Plow company has received permission from the war

department to extend the boundary line of its property out into the river about 30 feet, on condition that a proper and substantial retaining wall be built that will for all time stand for the river bank.

The Broadway Sunday school went to Cambridge on the 8:30 train on the C. R. I. & P. road this morning for the annual picnic of the little folks. Two extra coaches were attached to accommodate them. The excursionists return to Rock Island on the 7:30 train this evening.

Aug. 2.—The Y. M. C. A. rooms over the People's National bank have been repaired and repainted and otherwise improved, these being some of the changes Secretary Lang is making preparatory to the coming of the state Y. M. C. A. in September.

Aug. 6.—M. M. Sturgeon and family are enjoying themselves camping out on Vanduff's island.

Aug. 7.—Another experimental trip was made on the electric street railroad in Davenport this morning, and the result was very satisfactory. The company will commence the electric cars regularly in a few days, and the only fears that are entertained are as to the workings of the system in winter. If the electric road is as popular next spring as it is now in Davenport, it will be introduced on the Moline and Rock Island line without fail.

Aug. 8.—Superintendent Gamble of the Moline & Rock Island Horse railway has decorated the bridges of the horses on his line with handsome red tassels. Gamble believes a little gaiety now and then is relished by the best of us—and he is right.

The new telephone police system has been formally introduced in Davenport. This would be a good scheme for Rock Island.

WILSON'S PEACE ENVOY TO MEXICO IS THE LINCOLN TYPE OF A MAN

John Lind.

(Chicago Tribune Special.)

Minneapolis, Minn., Aug. 9.—A man who has been called "of the Abraham Lincoln type," homely, but with the pleasing kind of homeliness, simple and straightforward. This is the man who has been chosen by President Wilson as his personal representative in Mexico.

That man is John Lind, a farmer governor of Minnesota, native of Sweden.

"Probably there is no man in Minnesota or in the whole northwest who is nearer the people or who enjoys in as great a degree their absolute confidence," said a lawyer partner of the envoy in discussing Mr. Lind's character.

Lind's manner is direct; there are no two ways of interpreting his convictions. And he carries conviction of honesty and sincerity of purpose. Lind can be firm without giving offense, he has excellent powers of discriminating the essential from the trivial and is endowed with sound judgment and an earnest, sympathetic nature.

The news dispatches intimated that Lind might be the next United States ambassador to Mexico. Lind, however, is beyond the stage of personal ambition. He is serving in his present capacity because he believes it his duty to do so. Lind will not be the next United States ambassador to Mexico, nor will he hold office again.

He is entirely content to devote himself to the practice of law in Minneapolis and to the welfare of the state and the nation when occasion demands. He declined nomination for the governorship of Minnesota in 1908 and also declined to run for United States senator from Minnesota in 1910 and 1912.

Mr. Lind is president of the board of regents of the University of Minnesota and believes that he can do much good in that position. It was only through his sense of public duty and the urgency of the case that he was induced to undertake the Mexican mission.

The question has been asked, does the governor speak Spanish? He does not, but is an excellent linguist, having a thorough knowledge of the Scandinavian languages, and can speak both French and German fluently. Probably the reason for Lind's selection for the difficult duties of special envoy of the president of the United States to the troublesome southern republic was a friendship of Secretary of State Bryan and the latter's confidence in the Minnesotaan's judgment and ability to act in a crisis. Lind and Bryan served in congress together and during the best of friends. Bryan never comes to Minneapolis but that he stays at the home of the former governor. Bryan has an intimate knowledge of what Lind can do and this was the

reason he urged President Wilson to appoint him.

Lind's destinies apparently were shaped by an accident, the explosion of a gun in his earlier years, which deprived him of his left hand. He was born on a farm in Sweden. His birthplace is Kanna, in the province of Småland and where he first saw the light of day, March 25, 1854. When he was 13 years old he came to America with his parents, and they settled on a farm in Goodhue county, Minn. It was here the accident deprived him of his hand. This necessitated his having an education, which was obtained through the schools at Red Wing and the state university. He taught school three years and entered the university in 1875. Financial circumstances compelled him to leave at the end of the first year.

He then studied law
